## Become a "Hero of Hope"

Zimbabwe was once considered one of Africa's most economically resilient countries. Now it is a land where 1 in 4 people have HIV/AIDS accounting for 3000 deaths per week. Life expectancy at birth is 37 years and now there are shortages of fuel, electricity, medicine, cash and just about every basic necessity there is. Even for those that can afford to buy the basics they can not do so because of severe shortages. The situation is worse for those living in the rural areas such as the Mununa Village.

Donations of sewing machines will directly help the people of this impoverished community have a better quality of life. **Funds raised will buy 40 sewing machines for the men & women of the Mununa Village, Zimbabwe.** With these sewing machines they can make clothing for their children, themselves and the many orphans in the village. They can make required school uniforms, mend clothing for others in townships and cities, make additional items for sale and earn a living to help support their families. Additionally, free sewing classes are planned providing vocational training, fellowship and mentoring.

**Anticipated average project cost is \$400 per unit to include sewing supplies**

Our Rotary District 7190 **Ambassador of Hope, Thabani Jubane** is overseeing the development and implementation of this project and is supported in the Mununa Village by a caring and devoted team
